The growth in sales in the product verticals during the year, as compared to last year has been as under:

(₹ Crs.)

| Product Vertical  | 2813-14 | 2012-13 | % change |
|-------------------|---------|---------|----------|
| Dye Intermediates | 164.95  | 128.45  | 30.45%   |

| Total             | 210.37  | 178.67  | 19.14%   |

On the export front, we have had a reasonably good performance during the year at Re. 23.88 Crs, after a full of nearly 2 years which is of great eignificance specifically considering our fairly large imports, making our company a net importer.

As regards the expensions which were under implementation, it may be received that your company was sanctioned a term loan of Rs.6.00 Crs, for the following expension:

- Enhancing the capacity of the SSP plant from the current 45,000 TPA to 1,00,000 TPA and additional GSSP Plant for 300 TPD.
- II. Automation of the DCP plant thereby enhancing the capacity from the current 4500 MTA to 5400 MTA

III. Initiating certain process improvements in the H-Acid plant thereby increasing the capacity from the current 2400 MTA to 2700 MTA.

All the expensions as aforesaid have been completed and the plants out into operation as under:

1. Capacity enhancement in the SSP plant:

The SSP plant with the enhanced outpacity was put into operation in End August 2013.

II. Modernisation of the DCP plant:

The modernization of the plant has been completed and the plant was put into operation in July as per schedule.

II. Process modification of the H-Acid plant:

The commissioning of the new process was put to operation by late November 2013.

All the plants with the enhanced capacity are now fully in operation.

The SSP plant was shut down from April 2013 to August 2013 for modification of the curing shed and installation of the moving garshy within the shed and as such the effective available outpaolty of the plant for the remaining part of 7 months of the year was only to the setent of 58,000 MT. However in the process the Company had lost the entire Kharif season and could evail only the peak period of the Rabi season of 2 months. Added to this the untimely rains and draught conditions during the year resulted in capacity utilisation of the plant to the extent of about 63% and contributing Ra.31.38 Cra to the overall revenue, which has been a tad lower than that of last year.

### FUTURE OUTLOOK:

We are in a state of transition and our paramount aim is to gain a position as a leading multi faceted manufacturing house catering to the emerging changes in the Dya/Dya Intermediate and agro-industrial sector of the country.

With the consistent shift in the manufacturing base of Dyes and Dye-intermediates from the western countries to the Asian countries, the Dye-intermediate market is also witnessing an all time high demand and is quite buoyant. However, the consistency and stability of this situation on a long term prospective would ultimately pave the path for an accelerated growth of the sector in the country.

On the suport front, we are making a positive thrust so as to taper the difference between our exports & imports which would assist us in a big way to save against hazards of FE rate fluctuations.

As regards our fertiliser division after a note worthy start at the commencement of the division in FY 2011-12, the performance of the division has been moderate. With the licensing requirement of the Agriculture ministry, we have successfully enhanced our capacity from 45,000 TPA to the current 1.00 takin TPA which has been commissioned in August 2013. Though, with the exclutions of Shriram Fertilisers on the marketing front, we are policed for a good performance of the division in FY 2014-16, yet the Moneogra will clearly be a variable, given the various predictions of a below par moneogra.

Anote worthy softlevement of your company has been on the external credit rating front. Though during the last nearly 1% years our credit rating had elipped from the earlier 'BBB- & A3' rating to 'BB+ and A4", mainly as a direct fall out of the tight accommic accenario prevailing in the country, adversely affecting the industrial sector as a whole, during the current assessment by KRA, our credit rating agency, we have not only regained our earlier status but have also gone up one notch higher to 'BBB and A3+", which directly speaks about our performance and financial discipline. This improvement in the credit rating by 2 notches would result in lower interest rates on our Bank Borrowings, an important factor for further improvement in our cost controls.

On the administrative front, the SAP accounting system which was introduced about 3 years back, has now started operating amouthly after the minor gittches faced during the initial years. We now forease to generate meaningful MIS reports from the system to further improve upon our efficiency and management control. We are also now equipped with a full time Company secretary on our payroll, which was a shortcoming on the administrative front for guite some time.

The year sheed will be challenging, considering our efforts to go in for further expension of our Dye-Intermediates division through an IPO proposed to be taunched post December 2014. Considering the present demand for our products, we have targeted a growth of around 35% for the current year, wherein we would see a further improvement in our bottom lines.

### RISIOS & CONCERNSE

After the impact of the global metitiown, which we have to a very great extent successfully circumvented, we are still in the shadows of the economic slowdown prevailing in the country, we are still faced with factors such as the vagaries of unpredictable Monacons, the impact of a votatile FE market, the dependence on Government policies and decisions all of which utilimately impact the overall performance of the industry. These are all factors which are beyond the control of the private extensive and would continue to be a challence.

### DIVIDIEND

To preserve the resources for ongoing expansion and for increased working capital requirement, your directors do not recommend any dividend.

### PRIVATE PLACEMENT OF EQUITY SHARES:

As you are aware that IFCI Venture Capital Funds Limited (IVCF) has during 2009-2011 invested by way of Private Equity a sum of Ru. 15.00 Cross in the equity capital of our company towards part financing our senter Expansion of The Acid Complex and The Fertiliser Division, which has been completed and the plants aucoassfully commissioned. We have been for quite some times now making sincere efforts for listing of our shares at a recognised exchange with a view to provide an exchanges of BSE/ NSE and we had therefore proposed to enlist at "EMERGE" the NSE platform for SMEs. However as the IPO market was not been very conductive, the promoters had at the instance of IVCF bought back 11.46 lists shares in the past, likewise during the current year the promoters have bought back further 2 light shares bringing down their holding from the earlier 21.74% to 20.77%. A note worthy development in this regard has been that as per eavise of Keynote our BRLM, based on our current financials, we can now seek enfathment at the main Exchanges of NSE & BSE. Accordingly we are in the process of finalising the DRHP and propose to file the same with SEBI shortly.

If the position of the Primary market improves as is enticipated, it is proposed to bring the issue by end of the current than cital wear.
